RWATSON@ROYWATSON.COM

I have spent a significant portion of the last 15 years working on various Android projects for several clients in a variety of industries. I have developed Android apps for national TV Networks, Social Media sites, vehicle tracking/navigation/logistics, scientific and machine control/instrumentation applications.

I started utilizing Kotlin for most of my new android development starting in 2017 and Jetpack Compose in 2022. I have experience with the AndroidX components and many third-party libraries and frameworks.

I have extensive experience with the Android NDK. I have used it's JNI to build high performance routines for graphic coding/decoding, for high-speed video capture (codec) and for porting C/C++ open-source libraries to Android (i.e. FFmpeg, FFTW3, geotiff among others).

My personal Android apps have been downloaded well over 70,000 times with an average rating of 4.5+/5.0 stars. View them at:

https://play.google.com/store/apps/developer?id=Roy+Watson&utm_source=na_Med

I also have Flutter and iOS experience.

You can view my iOS apps (207,000+ downloads with average ratings of 4.6/5.0 stars:
